

ceiling

Last Modified on 25/05/2020 1:25 pm AEST

Rounds a number up to the next integer.

Function

```
result = ceiling(input)
```

Arguments

Argument	Data Type
input	numeric
result	int

Comments

Rounds up to the next integer. Positive numbers are rounded up. Negative numbers are rounded towards zero.

Examples

```
result = ceiling(100.75)  
/* result = 101 */
```
