

abs

Last Modified on 25/05/2020 1:24 pm AEST

Returns the absolute (non-negative) value of a number.

Function

```
result = abs(input)
```

Arguments

Argument	Data Type
input	numeric
result	numeric

Comments

Absolute value function that converts negative numbers to positive.

Examples

```
result = abs(-35) /* result = 35 */
```
