

# len

Last Modified on 25/05/2020 1:15 pm AEST

Returns the number of characters in the input string.

## Function

```
result = len(input)
```

## Arguments

Argument	Data Type
<b>input</b>	string
<b>result</b>	integer

## Comments

If the string is a rich-text string then this will be inclusive of HTML formatting characters.

## Examples

```
result = len('Brave New World') /* result = 15 */
```
