

hour

Last Modified on 25/05/2020 1:01 pm AEST

Returns the hour of a time or date-time value as a number.

Function

```
result = hour(input)
```

Arguments

Argument	Data Type
input	time (datetime will be implicitly cast to time)
result	integer

Comments

Returns the hour of a time as a number from 0 to 23.

This function operates in the local time-zone if a datetime input is provided. See [Dates, Times and Time Zones](#).

Examples

```
result = hour(#16:43#) /* result = 16 */
```

```
result = hour(getdate())
```
