

newguid

Last Modified on 25/05/2020 1:41 pm AEST

Generates a new globally unique identifier (GUID).

Function

```
result = newguid()
```

Arguments

| Argument | Data Type |
|----------|-----------|
|----------|-----------|

| | |
|---------------|--------|
| result | string |
|---------------|--------|

Comments

Generates a new globally unique identifier as a string, without braces.

The **newguid** function is not available for use in reports.

Examples

```
result = newguid()
```
