Add

Adds two numbers.

Example:

```
[Invoice Total] + [Delivery Cost]
```

Subtract

Subtracts the second number from the first number.

Example:

```
[Invoice Total] - [Discount]
```

Multiply

Multiplies two numbers.

Example:

```
[Unit Price] * [GST Percentage]
```

Divide

Returns a decimal result of a numeric division.

Example:

```
[EBITDA] / 12
```

Modulo

Returns the remainder of an integer division.

Example:

```
10 % 7 /* result = 3 */
```

Negate

Reverses the sign of a number.

Example:

-[Discount]
