Partner Development Program

Last Modified on 10/07/2025 12:53 pm AEST

The ReadiNow Partner Development Program is designed to equip partners with the skills, experience, and confidence required to successfully deliver solutions using the ReadiNow platform.

Through a structured three-step journey—**Training & Certification**, **Real-World Project Immersion**, and **Independent Implementation**—partners gain the technical expertise, project experience, and hands-on knowledge to become trusted implementation leaders.
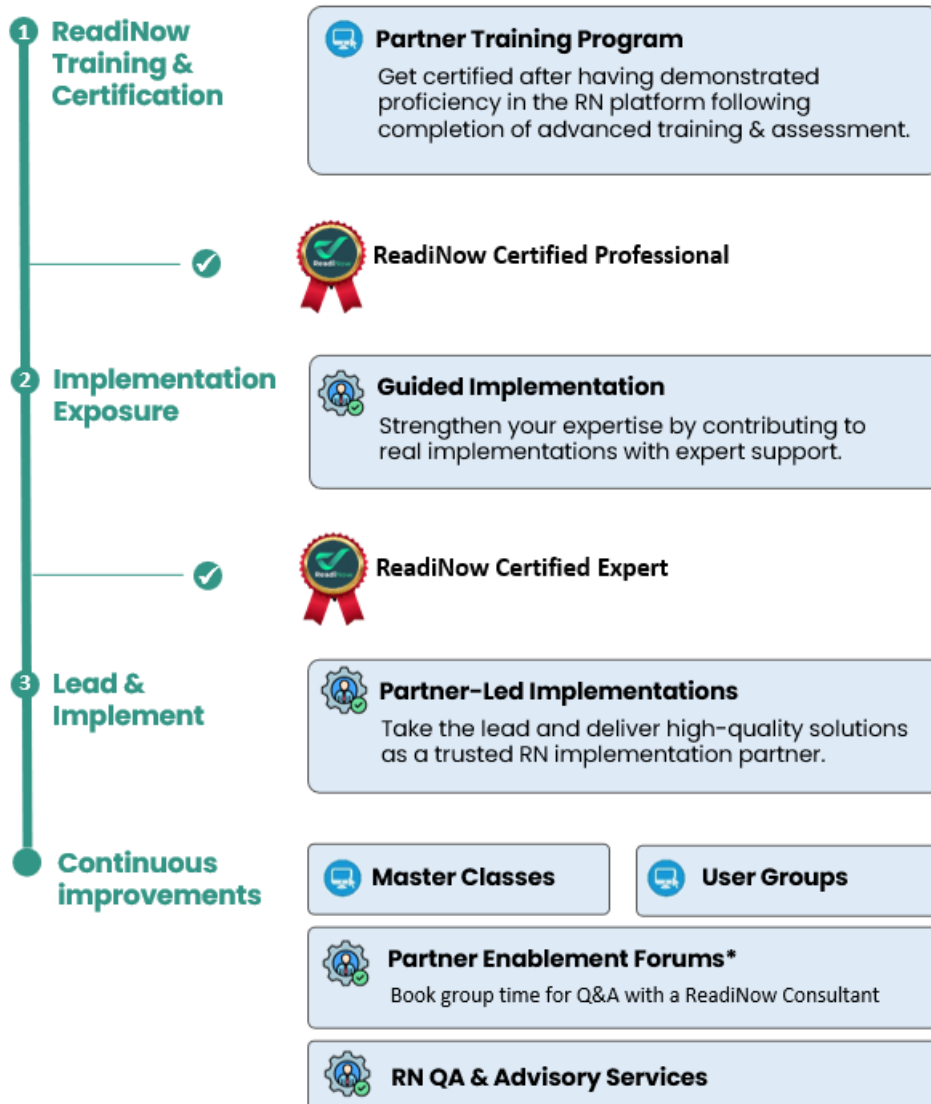

ReadiNow Certifications

To ensure consistency and quality in solution delivery, ReadiNow offers two levels of certification:

Certification	Description
ReadiNow Certified Professional	Demonstrates a solid understanding of the ReadiNow platform, including how to configure and administer core features. Certified Professionals are equipped to work on implementations alongside or under the guidance of ReadiNow expert.
ReadiNow Certified Expert	Recognises advanced expertise in solution design, platform governance, integration, and delivery of complex enterprise applications. Certified Experts are authorised to lead and deliver projects independently, without direct oversight from ReadiNow.

Partner Development Path

The development program equips partners with necessary knowledge and expertise for handling and building solutions using the ReadiNow platform.

① ReadiNow Training & Certification

Partner Training Program
Get certified after having demonstrated proficiency in the RN platform following completion of advanced training & assessment.

✓ **ReadiNow Certified Professional**

② Implementation Exposure

Guided Implementation
Strengthen your expertise by contributing to real implementations with expert support.

✓ **ReadiNow Certified Expert**

③ Lead & Implement

Partner-Led Implementations
Take the lead and deliver high-quality solutions as a trusted RN implementation partner.
