

Process Step Tasks on Record - Record Info Panel

Last Modified on 12/03/2026 11:51 am AEDT

When on a record page, users can easily identify and interact with process tasks in the Record Info Panel, accessible by clicking on the Process Step Tasks icon on the top right of the record page.

Within the info panel, users can see Process tasks assigned to themselves by default. Users can navigate to these tasks and complete them by clicking the 'Open Task' button.

Filters can be adjusted to see any other Process tasks for this record the user has access to, such as those assigned to other users or completed step tasks.
