

Welcome to Nova

Last Modified on 07/07/2026 4:17 pm AEST

ReadiNow Nova is the modern user interface for the ReadiNow platform, built from the ground up to give you a faster, cleaner and more flexible experience. Whether you are entering data, tracking work, running reports or building applications, Nova is designed to help you do it with fewer clicks and clearer guidance.

This guide introduces the Nova interface, the key building blocks you will work with, and how to get productive quickly. If you have used ReadiNow Classic before, look out for the "Coming from Classic?" notes throughout.

Note: During the transition period you may have access to both Nova and Classic. The underlying data, calculations, workflows and reports are shared - Nova simply presents them through a modernised interface.

Why Nova

Nova was designed to improve usability and user adoption while giving application builders more flexibility. With Nova you get:

- **Increased productivity** through a simplified, focused interface.
- **A modern, intuitive UI/UX** that improves usability and adoption.
- **ReadiAI** - access to AI-driven features such as Agentic AI, Workflow AI, AI Suggest and AI Explain.
- **ReadiNow Process** to orchestrate business processes on top of your workflows.
- **Multi-step forms** that break complex data entry into manageable steps.
- **An optimised mobile experience** with dedicated desktop, tablet and mobile layouts.
