

Coming from Classic?

Last Modified on 07/07/2026 4:17 pm AEST

If you are familiar with Readiness Classic, the table below summarises the main differences you will notice in Nova.

Area	Classic	Nova
Navigation	Left-hand menu plus a top menu.	Apps along the top; each app's pages in the top navigation menu.
Switching apps	Return to the landing page to change app.	Switch apps directly from the top bar.
Going back	Use the History option at the top-right.	Return to the source page automatically; breadcrumbs on the roadmap.
Forms	Single-page forms.	Modern drag-and-drop layout, multi-step forms and breadcrumbs.
Process	Workflows with User Action steps.	Readiness Process with visual progress, complementing workflows.
AI	Not available.	ReadinessAI: Agentic AI, Workflow AI, AI Suggest, AI Explain.
Devices	Primarily desktop.	Dedicated Desktop, Tablet and Mobile layouts.

Good to know: After moving to Nova, your functionality, calculations, process flows, data and reports remain similar to Classic - they are simply laid out differently across dashboards and forms.
